EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William O. Wooden, Pro Se inventor on March 16, 2005.

The application has been amended as follows:

In the Claims:

Claim 1. (currently amended) Apparatus for producing a micro-dispersed gas-liquid mixture, comprising a cylindrical housing having a cylindrical surface with bottom and top covers, which in turn incorporate:

a gas-liquid ejector unit consisting of said bottom cover of said cylindrical housing, a first part of ~~[[a]]~~ said cylindrical surface of said housing, an inlet for gas connected to a gas injection line, an inlet nozzle for liquid connected to an injection liquid line and a first partition of said cylindrical housing, said inlet nozzle having has both outside and inner surfaces to adapt ~~[[the]]~~ a conical orifice of said first partition to provide a required flow-rate of an ejected gas through said gas inlet;

a cavitation unit communicating through said first partition with said gas-liquid ejector unit, said cavitation unit comprising said first partition, a second part of said cylindrical surface of said housing, a hollow cylindrical cavitation chamber having at least one tangential inlet allowing a gas-liquid mixture from said gas-liquid ejector unit to flow inside the hollow

Art Unit: 1724

cylindrical cavitation chamber and a second partition having an orifice connected to [[the to]]
said hollow cylindrical cavitation chamber;

a jet dispersing unit communicating through said second partition orifice with said
cavitation unit comprising said second partition, a third part of said cylindrical surface of said
cylindrical housing, a hollow cylindrical dispersing chamber attached to said second partition,
said top cover of said cylindrical housing and an outlet connected to an injection well, said
hollow cylindrical dispersing chamber includes at least one outlet channel and a hollow dip at the
bottom of said hollow cylindrical dispersing chamber, said outlet channel communicates with
said outlet connected to said injection well.

Claims 2-4 (cancelled).

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest an apparatus for producing a micro-dispersed gas-liquid mixture, including a cylindrical housing with bottom and top covers, wherein the housing incorporates the specifically claimed gas-liquid ejector, cavitation unit and jet dispersing unit in that order, the ejector and cavitation unit being separated by a first partition and the cavitation unit and the jet dispersing unit being separated by a second partition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
